SUMMARY

An AI & Full-Stack Developer specializing in building real-world, impact-driven software solutions using Artificial Intelligence, Machine Learning, and modern web technologies. Experienced in end-to-end application development—from problem discovery and rapid prototyping to deployment and iteration. Strong hackathon background with leadership, teamwork, and product-focused execution. Actively seeking startup-focused internships to learn fast, build at scale, and contribute meaningfully.

SKILLS

- **Programming Languages :** Python, JavaScript, TypeScript, C, Rust
- **Tools :** Git & GitHub, Docker, Postman, VS Code, Figma, RStudio
- **AI/ML :** Machine Learning, Data Science
- **Core CS :** Data Structure & Algorithm
- **Frameworks :** React.js, Next.js, Node.js, Tailwind CSS, Bootstrap CSS, HTML
- **Leadership Skills :** Time Management, Effective Communication, Problem Solving, Adaptability, Critical Thinking and Collaboration, Public Speaking

EXPERIENCE

Team Lead | Full-Stack Developer

Smart India Hackathon (SIH) | 2025

- Led the development of **CivicFix**, an AI-powered civic issue reporting and governance platform.
- Designed system architecture integrating computer vision and NLP for issue classification and prioritization.
- Coordinated a cross-functional team, managed task allocation, and ensured timely delivery of features.
- Solution selected at the college level for innovation, feasibility, and real-world civic impact.

Hackathon Winner | Project Developer

UXcelerate.ai VibeHack | 2025

- Developed **UnityCure**, a healthcare assistant platform focused on improving access to medical support.
- Applied machine learning for symptom analysis and preliminary diagnosis recommendations.
- Recognized for strong UX design, scalability, and problem-driven product thinking.

Innovation Ambassador (Foundation & Advanced Level)

Institution's Innovation Council (IIC), MoE-AICTE | 2025 – Present

- Completed both Foundation and Advanced Innovation Ambassador training programs.
- Actively contributed to innovation-driven initiatives, entrepreneurship activities, and institutional programs.
- Gained hands-on exposure to startup ecosystems, design thinking, and innovation management.

Organizer & Student Lead

EDIC Club, Heritage Institute of Technology | 2025

- Organized technical and entrepreneurial events in collaboration with the core team.
- Assisted in event planning, coordination, and on-ground execution.
- Designed posters, certificates, and promotional materials for college-level events.

Student Member

Google Developer Groups on Campus – HIT | 2024 – Present

ACM HITK (Association for Computing Machinery) | 2025 – Present

PROJECTS

CivicFix

AI-Powered Civic Issue Reporting Platform-

- Built a full-stack, AI-driven platform to enable citizens to report, track, and resolve civic issues with transparency and accountability.
- Implemented computer vision models to analyze images of civic problems and NLP pipelines to process text and voice-based complaints.
- Designed role-based workflows for citizens, field workers, and administrators with real-time status tracking and notifications.
- Integrated geo-tagging and issue prioritization to route complaints to the correct department and ward automatically.

InVo

Offline-First Inventory & POS Management App-

- Developed an offline-first mobile application for small shops to manage inventory, sales, suppliers, and daily transactions efficiently.
- Implemented local data storage using SQLite with seamless synchronization when internet connectivity is restored.
- Generated weekly business reports and integrated AI-based insights to assist shop owners in stock planning and sales optimization.
- Designed a simple and intuitive UI optimized for non-technical users and fast retail operations.

UnityCure

AI-Based Healthcare Assistant-

- Designed and developed a healthcare assistance platform for symptom analysis and preliminary diagnosis suggestions.
- Built machine learning models to analyze user-reported symptoms and provide risk-based health guidance.
- Developed backend APIs for ML inference and data processing, and deployed the system using containerized infrastructure.
- Focused on user-centric design, scalability, and real-world healthcare accessibility.

ACHIEVEMENTS

- Winner – **UXcelerate.ai VibeHack 2025**
- Best Pitching Award – **Zero's Arena Hackathon 2025**
- Selected Team Lead – **Smart India Hackathon 2025 (College Level)**
- Active contributor to innovation, hackathons, and technical communities.

EDUCATION

Bachelor of Technology in Computer Science Engineering (AI & ML)

Heritage Institute of Technology, Kolkata | 2024 – 2028

Professional Certification in Artificial Intelligence & Machine Learning

IIT Patna Vishlesan I-Hub Foundation (Online) | 2025 – 2026

2028

Kolkata, WB
